ALIENS ARE HERE TO HELP  
HUMANLIKE BEINGS FROM OTHER TIME CONTINUUMS ARE HERE TO ASSIST MAN-  
KINDS' DEVELOPMENT INTO THE FOURTH DIMENSION.

By Mary Hardy

Since my husband and I built a specially designed pyramid we have been contacted by aliens (Space Brothers) from higher planes of consciousness. This is their explanation as to why they are here.

They came to teach and to help humanity make the transition into the fourth dimension. This is necessary because the earth will be advancing into a higher electromagnetic frequency.

In 1982 when the planets form a line in space a new progression of evolution will take place in the solar system. It will be the start of the birth of the planet Vulcan. For about fifteen years the solar system will be disrupted. At this time the earth will move its orbit to the fourth position from the sun. Earth people will find themselves entering the fourth dimension. Matter will not exist as we know it now. The vibratory rate or electromagnetic frequency will advance to what scientists call the fourth dimension.

Our scientists are just beginning to understand this new knowledge. It will be called THE NEW SCIENCE. Understand, it is learning to use light at a faster speed or higher frequency. The atomic structure of light will be refocused into its sub-atomic particles. The sub-atomic energy level is called TACHION ENERGY.

The new science of controlling tachion energy was formerly called Parapsychology or the supernatural control of mind over matter. When an individual deals with energy on its sub-atomic level--time and space are changed. Phenomena occurring by the use of tachion energy will be greatly changed from the physical state that science now can test and study.

Almost everyone has had a psychic experience. Most of these experiences occur on a sub-atomic level. ESP, Clairvoyance and the bending of nails and keys--psychokinesis are all achieved by the person's ability to use sub-atomic energy.

At the present time this energy is called tachion energy because of its nature. Before you can ever have an electron, you have a mass of tachions that wish to coalesce together to provide enough energy to become all the other sub-atomic particles. Ultimately they build up to form the nucleus of the atom. To "tach on" means to "stick to." Tachion energy is the glue of the universe.

Energy in the atomic state (physical world) is nothing more than the slowed down tachion energy. When light energy is slowed down the tachions form the particles that make up the atomic structure of all matter.

Our brains have the ability to function on atomic consciousness (physical) or tachion consciousness (spiritual). The spiritual use of the brain can be achieved by going within as Jesus taught humanity.

Science is on the threshold of understanding this. And with this understanding--time and space as we know it will change. Mankind will have entered the fourth dimension. The world will have given birth to the NEW SCIENCE.

Jesus demonstrated the use of the new science when he walked the face of the earth. He said to each and everyone of us, "These and greater things you can do also." Jesus had the ability to change matter into its tachion energy level and reconstruct out of the old, a new atomic structure. He did this by altering his mind energy. This is how he changed water into wine.

The Hermetic student has always been taught the ability to use mind energy. The first step is to learn to see the electromagnetic energy field around all living things. When a person can see this he has begun to use the tachion or third eye center in the brain. He has learned to see the light.

The pyramid was given to mankind to help him develop this center. Pyr-a-mid means light in the middle. The pyramid refocuses light into a higher frequency so that mankind can learn to use and understand the fourth dimension.

Jesus said, "God is Light." God has not hid himself from his creation. With the New Science the mind has been activated in such a way that the person can now use the Spiritual Side of reality. He understands the Father's plan.

The aliens are here to help us understand light. They are the messengers of the Father, the Light Bearers. History has known them as angels. They have existed through out all time and recorded history. When you can see the aura you can recognize the aliens or angels. There is a completed circle of light above their head.

In this way they are known!

## TESLA--THE LAST OF THE BIG TIME PYRAMID ENGINEERS

By Mary Hardy

The 1980's bring in the realization of an energy shortage. Whether real or contrived it is important that the world find a new source of energy. Our quest for a new energy source may already be answered. Its secrets may be found in the theories of a little known genius named Nicola Tesla and in understanding the secrets behind pyramid energy.

Few people realize that the great pyramid complex stationed around the world make up an interplanetary communication network. Proof that the great pyramids of the world are solid-state electronic modules in a world-wide power generating network was established by this superhuman genius nearly a hundred years ago. Tesla knew that there was a powerful voltage gradient between the Earth and the upper atmosphere.

Scientists claim that they don't know how or why the Great Pyramid of Giza was built. What should be realized is that these pyramids are broadcasting antennas. There are four main stations located at Giza, Easter Island, the west coast of the Americas and China.

These four pyramid complexes make the earth a broadcasting crystal operating off the Schumann Layer. Research published in SCIENTIFIC AMERICAN reported the discovery of an ionized layer in the upper atmosphere which selectively filtered radio waves in the 7 $\frac{1}{2}$  cycle per second band. The Schumann Layer is actually a radio diaphragm big enough to wrap around the entire world. Not only do we receive the radio signals inside this diaphragm, but it turns the entire planet into a radio broadcasting crystal that sends messages into space powerfully enough to reach the other planets.

The 7 $\frac{1}{2}$  Hz. frequency possesses two properties of great interest to the military. The first is that it can travel all around the world on the Schumann Layer without losing signal strength; the other is that it penetrates water. The United States Navy realized this was just what was needed to keep in constant radio communication with the nuclear submarine fleets ranging under the world's oceans, so the Navy began a new world-wide military communications system broadcasting on the 7 $\frac{1}{2}$  Hz. frequency by stripping to bedrock a 10,000 acre area in Wisconsin to function as the antenna.

Michigan residents are familiar with the Seafarer Program. This is an antenna system that will tie into the already present system developed by an ancient society that built the Great Pyramids.

Tesla demonstrated that the Earth was an electrically charged body and that such forces could be manipulated on a global scale. He stated that our planet's response to the ancient broadcasting system was to behave as a conductor making it possible to transmit power in unlimited amounts, almost without loss, for great distances.

Tesla developed the idea for an energy-distributing system able to operate motors for automobiles, boats, aircraft. Tesla built a great transmitting tower at Wardencliff on Long Island which was dismantled when the United States entered the Second World War. Undaunted by success, Tesla continued his experiments to prove that when his antenna was pumping electric waves into the earth, he could drive a metal rod into the ground anywhere and draw electricity for lighting lamps and driving motors as long as his tap was located at precise harmonic intervals from his transmission station.

Until the end of his life, Nicola Tesla dreamed of removing the unsightly high-tension electric power transmission towers and replacing them by electrifying the entire planet with his revolutionary engineering of planetary resonance. But if power were broadcast instead of piped, how could Consolidated Edison and other major power companies get their money? If anyone could get energy from the ground, how could Standard, Shell and Opec Cartel create an energy shortage in order to drive up prices? If we can all communicate on the natural radio where will Ma Bell and RCA get their cuts?

As soon as powerful financial interests learned of Tesla's discoveries, they made sure that he would never be able to accumulate enough money to do anything that would upset the monetary-industrial establishment.

Tesla's inventions were credited at a later date to other scientists who could be counted on to keep the boat steady, and his name was virtually erased from publication. When he died in New York on a winter's night in 1943, he was alone in a hotel room--not much wealthier than the day he arrived in the United States 50 years earlier with four cents in his pockets. The Secret Service of the United States immediately sealed his room and whatever papers he had were transferred to government vaults, where they remain to this day.

Tesla was the last great pyramid engineer. His dream was to give the world a system of cheap energy. It is time we looked at his ideas and discovered our real history. Who built the Great Pyramids that could give us cheap energy? Why is the military using this system to communicate with its nuclear submarine fleets and not revealing its existence? Why are we denied Tesla's knowledge and technology?

The information for this article came from two sources. 1) T.B.Pawlicke article in PURSUIT summer 1977, THE PYRAMIDS ARE AN ANCIENT SPACE COMMUNICATIONS NETWORK and 2) Planetary Association for Clean Energy, 100 Bronson/1001, Ottawa K1R 6G8 Canada
